Information Reporting Program Advisory Committee Issues Annual Report

WASHINGTON — The Information Reporting Program Advisory Committee (IRPAC) today issued its annual report for 2014, including numerous recommendations to the Internal Revenue Service on new and continuing tax administration issues.

"The IRS values the insight and perspective IRPAC provides," IRS Commissioner John Koskinen said. "The committee members have experience working with an incredibly diverse range of individual taxpayers and organizations both large and small. Their feedback helps us improve tax administration for the nation, and we will study their recommendations closely."

The report includes a discussion of the IRS Taxpayer Identification Number Matching Program and a recommendation that IRS expand the program, permitting financial and other firms to use it to verify taxpayer names and identification numbers on a greater variety of information returns.

During 2014, the committee continued its dialogue with IRS officials regarding reporting requirements under the Foreign Account Tax Compliance Act (FATCA) and the Affordable Care Act (ACA).
